

AIRPORTS • BUS STATIONS • RAILWAY STATIONS

Transport Hubs

The SUBWAY® chain has a flexible approach to the physical layout of its outlets so they can be adapted to fit the needs of most environments. The stores are efficient, convenient and provide quick service which fits well into the fast paced environment of transport terminals, such as airports and train stations.

Current notable locations include:

- Victoria Collonades - London
- Bristol International Airport
- Birmingham International Airport
- Euston Collonades - London
- Birmingham International Railway Station
- Cork Airport
- Piccadilly Station - Manchester
- Reading Station

Landlords that currently have SUBWAY® outlets operating in transport terminals include:

- Bristol Airport
- Piccadilly Gateways Limited
- First Great Western
- Dublin Airport Authority PLC
- Birmingham International Airport

Our requirements:

- A1 usage
- High volume footfall
- High visibility
- Minimum 350 sq. ft.

“The SUBWAY® chain has two stores in Reading railway station, one in the main concourse and a smaller satellite store on the footbridge. It is a good tenant and also creates an energetic atmosphere in the station. Both stores are able to provide the full menu of products and the efficient service works well in the busy terminal so they attract a steady flow of customers all day.”

Mark Dix, Estates Manager, First Great Western
